

An ultimate nutrients mixture for premium plant growth

Contains all three forms of Nitrogen such as Urea, Ammoniacal & Nitrate for balanced nutrition

Packed with
highest nutrient
content

60%

Teckna20 is a premium water-soluble fertilizer with 20% each Nitrogen, Phosphorus and Potassium. This is a superior formulation developed using micronized technology for quick dissolution in water, better nutrient absorption and faster growth responses in plants. This powerful fertilizer provides balanced nutrition for healthy plant development, yield and quality. Teckna20 can be used in various stages of all crops from seed to maturity.

CONTENTS

Total Nitrogen	20%
Phosphorus as P_2O_5	20%
Potassium as K_2O	20%

DOSE & METHOD OF APPLICATION

Foliar spray:

Dissolve 5 to 10 grams per litre of water and spray over the crop during active growth and reproductive stages.

Fertigation :

Dissolve 5 grams per litre of water and apply during active growth and reproductive stages. Teckna20 can be mixed with other foliar chemicals.

State of the art R&D and Production facility

Our products are formulated with care and precision. The custom designed high-tech engineering facility and the Artificial Intelligence (AI) based crop testing system ensure highest product quality.
